PU 7010 z and PU 7011 z: Different looks - accustomed performance

The fuel filters for Ford Kuga II, Ford Focus III, Peugeot 308 II, Citroën Berlingo II and many other vehicles with 1.5-2.0l diesel engines look completely different now.

The use of an elastomer sealing ensures fast, reliable and tight mounting in the housing. The outer cage of the element serves as carrier for the hydrophobic water strainer and improves the stability of the element.

Despite looking different now, the PU 7010 z and PU 7011 z deliver the accustomed OE quality.
MANN-FILTER - Perfect parts. Perfect service.
