W 11 102/34 vs. W 11 025: a new MANN-FILTER oil filter for VOLVO / Renault applications

New W 11 025 for VOLVO Truck / Renault Truck applications

Following the new VOLVO and Renault trucks spin-on filter, MANN-FILTER replaces the former W 11 102/34 by the new MANN-FILTER W 11 025.

Instead of a thread cover with round inlet holes like the W 11 102/34 shows, for W 11 025 we use our MANN-FILTER typical and established horseshoe-shaped inlet holes at the thread cover.

W 11 102/34 for VOLVO Construction Equipment applications

VOLVO CE will continue to use the well-known and proven MANN-FILTER W 11 102/34 for off-highway applications.

W 11 102/34
off-highway applications

W 11 025
truck applications

As usual you find the corresponding applications for both filter types in our MANN-FILTER online catalogue.
