Manufacturer: BMW

LuK RepSet: 624 3530 00
624 3535 00
624 3540 00

LuK RepSet DMF: 600 0230 00
600 0234 00
600 0296 00
600 0298 00

For current listing refer to parts catalog

For various engines of the manufacture above, the technical configuration of the clutch disc was changed during the production period. As a result, there are two different clutch disc versions which repairers may encounter.

Original clutch disc (Fig. 1):

- Rigid hub connection
- Diameter 240mm

Optimized clutch disc (Fig. 2):

- With hub damper
- Diameter 228mm or 240mm

The LuK RepSet and LuK RepSet DMF listed above contain only the optimized clutch discs. They can replace all versions without restriction. Installing the optimized version in place of the original one can even perceptibly improve the car's driving comfort when starting out from standstill.

The clutch discs of the LuK RepSet/DMF meet all technical specifications and can be used without restriction in combination with new flywheels or with ones already in use.

Fig. 1: Clutch disc with rigid hub connection (diameter 240mm)

Fig. 2: Clutch disc with hub damper (diameter 228mm or 240mm)

Please observe the vehicle manufacturer specifications!
