

## **MEYLE-ORIGINAL cabin air filters: Your body's first line of defence!**

### **New cabin air filter for a wide range of VAG applications**

Cabin air filters prevent airborne pollutants from entering the passenger compartment. Failure to replace the filters regularly may cause the filter elements to clog. The consequence: While overall airflow is limited, insufficiently cleaned air fills the vehicle cabin. As smog and smog-related health effects are becoming increasingly serious, regular replacement of the cabin air filters is all the more important. There are two factors determining filtering performance: accuracy of fit and quality of the filtration medium.

The MEYLE engineers have developed the new MEYLE-ORIGINAL cabin air filter (MEYLE no.: 112 320

0011; Short no. MCF0099) with ease of installation in mind: Unlike the original version, the MEYLE part has a more flexible design eliminating the risk of tearing the filter during installation. Thanks to the optimised design, repair professionals benefit from simplified handling and time savings.

The new MEYLE-ORIGINAL cabin air filter (MEYLE no.: 112 320 0011; Short no. MCF0099) caters for a wide range of makes and models, including the Audi A3 (model years 2003 to 2012), Seat Leon/Toledo (model years 2004 to 2010), Skoda Octavia II, Superb II and VW Golf V/Golf VI.

**Flexible filter  
design simplifies  
installation  
procedure!**

**MEYLE no.: 112 320 0011**  
**Short no. MCF0099**

#### **Information**

The MEYLE engineers recommend:

**Have your cabin air filters replaced every 15,000 km or once a year.**
